How to Execute the program

1. Copy target/mapreduce-0.0.1-SNAPSHOT.jar to CS6360.udallas.edu

2. Logon to server, Browse to above directory where file was copied.

3.Execute following command.
hadoop jar mapreduce-0.0.1-SNAPSHOT.jar bigdata.mapreduce.DownloadBigData

When you press enter, it would ask for destination path. Please provide path to which current logged in user has access

Please provide Destination File Path:
hdfs://cshadoop1/user/kpw150030/

Press Enter, It would show you series of messages which would provide details of files it downloaded and extracted.
